

FOREWORD

BY THE VICE-CHANCELLOR

Assalamualaikum Warahmatullahi Wabarakatuh and greetings.

First and foremost, *Alhamdulillah*, praise be and my utmost gratitude to Allah S.W.T for His endless blessings.

As observed in our national landscape, the concept of sustainability is often applied in various aspects of national development in line with the preliminary aspiration to become a developed country by the year 2020. Hence, the contribution of public universities towards the progress of a country cannot be denied because it is here that the intelligentsia will produce brilliant leaders of the future. It is befitting that all activities on public university campuses are planned and managed based on the philosophy of sustainability.

Moreover, the implementation of the sustainable campus development plan for UiTM sits on a solid foundation as it has been enshrined in the **UiTM CAMPUS SUSTAINABILITY STRATEGIC ACTION PLAN (UiTM CSSAP) 2022-2030** which is also in tune with UiTM's mission.

The UiTM CSSAP 2022-2030 document employs elements of sustainability and is not only focused on physical development. This desire is expressed through

the six clusters highlighted in this document: **Smart and Green Infrastructure, Sustainable Energy for Green Campus, Sustainable Waste Management, Water Conservation for a Great Campus Life, Sustainable Transportation, and Advocate Education for Sustainable Lifestyle.**

The initial idea for UiTM CSSAP 2022-2030 was sparked by UiTM's former Deputy Vice-Chancellor (Development), YBhg. Professor Dato' Ir Ts. Dr Hj. Mohd Fozi Ali. Thus, a token of appreciation and gratitude is owed to him for all the services and contributions channelled into the production of this document.

In closing, I sincerely hope that the development of a sustainable campus at UiTM will not only benefit its citizens but also set an example and raise awareness in the surrounding community on the importance of a sustainable environment for universal well-being.

Professor Datuk Dr Hajah Roziah Mohd Janor
