

FOREWORD

Bismillahirrahmanirrahim.

Alhamdulillah, praise be to Allah S.W.T, and congratulations to the editorial team on the publication of the **third edition** of **RISE magazine**. The magazine is a beacon of pride and a testament to our commitment to showcasing UiTM's remarkable research and innovations. This latest edition serves as a window into the depth and breadth of our contributions to the world of Artificial Intelligence (AI).

Artificial Intelligence (AI) has transcended boundaries and integrated seamlessly into our everyday existence. The influence of AI is, therefore, irrefutable and it is our collective responsibility to embrace its transformative power gracefully. Within the pages of this magazine, you will discover a diverse array of projects undertaken by UiTM researchers, geared towards serving our community in both the immediate and distant future.

As I leaf through the pages of **RISE**, I am filled with unflagging excitement and reminded of how far we have come as a university. The landscape of research at UiTM has evolved significantly, with research endeavours now playing a pivotal role alongside teaching and learning. The synergy between research and education has elevated our institution to new heights, providing a richer, more meaningful academic experience.

The Office of the Deputy Vice-Chancellor (Research and Innovation) UiTM continues to seek constant support from researchers, academicians, and administrators alike. By fostering a robust research ecosystem, we anticipate UiTM becoming a **globally renowned university by 2025**. To this end, we remain committed to providing the necessary support, recognition, and facilities to invigorate the spirit of our researchers.

I invite you to see **RISE** not solely as a magazine but as a potent tool for showcasing the impactful work we do in UiTM. In fact, when you attend conferences or engage in meetings with potential collaborators, consider sharing **RISE** with them. You never know what opportunities may arise from this simple gesture, as doors may swing open to new partnerships and collaborations.

In closing, I express my sincere gratitude to everyone who has contributed to the creation of **RISE Issue 3**. Together, we continue to raise the flag of UiTM high, illuminating the path towards a future powered by Artificial Intelligence.

Thank you for your dedication and unwavering support.

Warm regards,

PROFESSOR DATUK DR HAJAH ROZIAH MOHD JANOR

Vice-Chancellor
Universiti Teknologi MARA
